CONNECTION CYCLE
GROUP

Offer sheet

Order-to-energization for electric cooperatives and municipal utilities.

November 2026. Fees in United States dollars. Suitable to forward as it stands.

Connection Cycle Group fixes the path from a new-service application to energization. Engagements are remote, asynchronous, and fixed in scope. We take one client at a time, beginning with utilities in Colorado and the Mountain West. Faster connections and hours returned to staff come first. Lower cost is the payoff.

ENGAGEMENT	FEE	TERM	DEPOSIT
Connection Cycle Diagnostic	$3,500	1 week	$1,750
Full Connection Cycle Audit	$7,500	2 weeks	$3,750

Diagnostic

Maps the application-to-energization flow and finds where orders stall. Stages: application, credit and deposit, staking and engineering, easements, permits and fees, construction, meter set, and billing.

- Where orders stall, ranked.
- A written findings report and a readout.

Full audit

A deeper end-to-end analysis of the same cycle, a cycle-time baseline, and a fix roadmap, delivered as a written report and a readout.

The Diagnostic fee is credited in full if the Audit is signed within 60 days.

How to buy

- Card: the Diagnostic deposit of $1,750, on the payment link at connectioncyclegroup.com. Balance on delivery.
- Invoice or purchase order: request on the site or by email. Half the fee reserves the next open start week.
- Board-approved contracts: we will state a fixed fee or a not-to-exceed amount.

Terms

- No retainer and no subscription. One client at a time.
- Remote and asynchronous. Staff time is about two to three hours.
- Half the fee to begin. The balance is due when the report is delivered.
- We sign your nondisclosure agreement before any files are sent.
- Advisory work. A written findings report is the deliverable. Results are not guaranteed.
